TITLE : PROGRAM RECORDING/RESERVING DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a program recording/reserving device evading an overlap of reservation only by one program recording/reserving device even when program reservation are overlapped and recording plural overlapped programs.

SOLUTION: A rebroadcast retrieval part 25 and a program reservation information comparison/renewal part 24 are provided in a schedule control part 18, and when the program reservation are overlapped, the rebroadcast retrieval part 25 retrieves a rebroadcast and a repeated broadcast of an overlapped program from program formation information, and the program reservation information comparison/renewal part 24 changes the program reservation to a broadcast time band not to be overlapped. Thus, the overlap of the program reservation is evaded, and the programs that the broadcast times are overlapped are recorded.
